Education

California State University, Long Beach GPA: 3.5
Bachelor of Science in Computer Science, Minor in Cybersecurity *August 2024 – May 2028*

Certifications and Skills

Certifications: CompTIA Network+ (N10-009), Google AI Professional, 200-301 CCNA (In progress)
Platforms: Linux, SCADA, n8n, MS 365, CRM, Docker, Active Directory, Splunk, GitHub, AWS, Azure, GCP
Skills: Python, nmap, Power Automate, Burp, SQL, Troubleshooting, Cable Management, NodeJS

Experience

IT Automation Intern Oct. 2026 – Present
Irvine Ranch Water District *Irvine, CA*
- Built event-driven industrial monitoring setups & SCADA tools using Python, MQTT, & Dockerized n8n
- Cut down manual support by engineering RAG pipelines on help desk tickets with the use of automation scripts
- Administered Azure cloud environments & server patch management while auditing security logs with Splunk

Information Technology Intern Aug. 2026 – Present
Blackmore Partners *Remote*
- Re-engaged 4,000+ executive contacts by managing automated outreach workflows to improve engagement
- Enabled self-service support for 100+ employees/partners by building a RAG pipeline based on corporate CRM
- Restored email functionality & unblocked accounts for affected users by resolving high-severity MS 365 alerts

IT and Cybersecurity Consultant July 2026 – Present
EZ IT Consulting *Cypress, CA*
- Resolved technical issues for 10+ clients by gathering information and narrowing down root causes
- Upgraded client security by auditing for outdated OS versions & reconfiguring admin Wi-Fi credentials
- Helped set up & move around desks, home office equipment, PCs, monitors, & printers for clients

Application Security Engineer Sept. 2025 – Present
Association for Computing Machinery *Long Beach, CA*
- Built prod-ready web apps & ran security audits using automated static analysis & dependency scanning
- Probed APIs and endpoints via OWASP ZAP and Burp Suite to uncover injection flaws & insecure file uploads
- Secured container infra with Docker Scout while drafting code patches for OWASP Top 10 vulnerabilities

Full Stack Developer June 2026 – July 2026
AWS x DxHUB *San Luis Obispo, CA*
- Aligned solutions with stakeholder needs on discovery calls with the CSUB Dean to surface advising pain points
- Improved advising for 25+ faculty members by architecting an AWS web app that generates schedules and plans
- Built a RAG pipeline with AI-driven guidance to help faculty advise courses for 1000+ freshmen every year

Projects

Home Lab | *n8n, ML, SCADA, Docker, Entrra ID, Azure, Splunk, Linux, Burp* Aug. 2026 – Current
- Performed pentesting (recon and web-app/remote exploitation) & threat detection with 4 VMs
- Simulated SCADA monitoring system using Python & Dockerized n8n that processed 120,000+ telemetry logs
- Simulated Entra ID by automating account creation via PowerShell scripting & resolving help desk tickets
- Hosting a configured Minecraft server using Ubuntu Linux with support for up to 5 players
